Moving collaboration tools to cloud is the natural step for most enterprices but the challenges moving there are many!

Very high understanding of datacentres and their challenges in todays highpaced IT-market.

Fluent in English & Swedish

Senior Project Manager/Advisory Consultant

Frontica Business Solutions

2015-2016

During 2015 Andreas managed the separation of email resources for Frontica's customers as part of the Akersolutions company de-merger. Andreas worked very closely with company management to design and implement a Office 365 based Exchange Online email solution, sized for 35000+ accounts. The delivery also included request for Cloudstorage, and cloud collaboration tools, resulting in implementation of Office 365 sharepoint online, and a recommendation not to move forward with Onedrive due to product being immature at the time.

Senior Project Manager/Advisory Consultant

Frontica Business Solutions

2014

Andreas managed the upgrade of the email solution for Akersolutions total 42 000 accounts. The project was initiated Q1 2014, included pre-study, business aspects, it-architecture, business case, design, build, implementation and migration. The project revealed several architectural challenges in Microsoft's Exchange 2013 product. This resulted in several re-designs by Microsoft for Exchange product, before project was completed Q1 2015.

Senior Project Manager/Advisory Consultant

Frontica Business Solutions

2014-2016

Andreas has managed a project to implement a private cloud platform based on VMware vCloud Automation Center (VCAC). During the latter part of 2014, Andreas took over a project that involves building a new 3PA (Third Party Access) VPN solution based on Citrix NetScaler.

In 2015 Andreas has initiated and managed a program for implementation of Microsoft's Office 365 services. This includes feasibility study, business case, and program governance.

A very extensive evaluation of the infrastructure has been performed to ensure a low risk implementation of Office 365.

In 2015, the customer undergoes a business divestment. The end state is to divide the company into three different entities. Andreas part of the separation is to ensure that the Exchange environment is separated and migrated to the new companies.

During Q2 2015, Andreas has also been involved as technical project manager in an initiative to upgrade the client's Lync solution from Lync 2010 to Skype for Business. Scope of the delivery was also to enable Enterprise Voice, which allows to use Skype as a replacement for desk phones, as well as an advanced solution for integrating Cisco video conferencing system with Skype for Business.

Senior Project Manager

Aker Business Solutions

2013-2014

Andreas runs the customer's large it infrastructure projects.

During 2013 Andreas conducted a large review of Aker Solutions' server park. This included several sub- projects, including the RFP and investment in new storage solution, a major upgrade of its 200 VMware ESXi hosts and its almost 2,000 virtual machines. The project also entailed a thorough cleanup in Active Directory.

During 2013-2014, Andreas conducted a pre study on the customer's email solution, that resulted in a new email platform based on Exchange 2013 for the customers nearly 50 000 mailboxes. All email accounts have subsequently been migrated to the new platform and the old platform has been decommissioned. During the project, a Exchange 2013 architecture issue was found, Andreas was responsible for an extensive troubleshooting together with Microsoft to ensure stable operations, this resulted in re-design for parts of Exchange product, and several Microsoft TechNet Articles/Whitepapers were produced.
