## Solution Architect/Project Manager

### Pharmadule-Emtunga

2007-2010

Project management, solution architect and strategic advisor. Cooperation with Pharmadule-Emtunga from transitions projects when they chose WM-data / CGI as a partner. Recommendation of solutions for different business challenges. Consolidation Projects where Pharmadule market during the financial crisis faltered, resulting in downsizing of operations.

Implementation VMARE a VDI solution that solved their problem when it comes to the above challenge. The solution was highly appreciated by Pharmadule staff and IT management. Pharmadule in a box where everything was configured in advance with a server that contained DC, file and print and DP functionality for client management, Internet router and WLAN. LAN / WAN and access to local and central resources.

Sales offices in the US where users had their own equipment with the requirements around security, they worked locally and all mission critical and core resources had to have access through the previously implemented VDI solution.

VMWARE ACE managed a fully virtual PC that solved their challenges and also check on the licenses when the ACE allows establishing how long a virtual machine must exist. Migration of local MOVEX to WM data / CGI central services.

strategic advisor towards both IT and the business
